Dlažba na terče je praktická všude tam, kde je potřeba vytvořit bezbariérový vstup na terasu, použití terčové dlažby je účelné i v okolí bazénů či zahradních sprch. Předností dlažby podkládané na terče je také možnost spádovat ji podle potřeby, a tím eliminovat nerovnosti terénu. Vzduchová kapsa, která vzniká pod dlažbou, funguje jako izolace proti hluku a zároveň ji lze použít pro vedení elektrické kabeláže. Instalace této dlažby na terasy, balkony, či jakékoli zpevněné plochy je velmi snadná, rychlá a levná a výhodou je, že při ní není třeba investovat do drahé stavební chemie. Oproti betonové dlažbě keramická dlažba na terče odolává nečistotám a nabízí luxusní design.
